

EQ RECORDINGS PRESENTS

BALANCE

014 Joris Voorn

ONLINE PRESS KIT - <http://www.stomp.com.au/press/balance014>

BALANCE 014 represents another step forward for the acclaimed DJ-mix series. Across two discs and using-remarkably-over 100 tracks, **JORIS VOORN** constructs a layered and seamless mix of some of the best tech house, minimal and electronic dance music. An epic mix in the very best sense of the word, **BALANCE 014** achieves the rare feat of combining variety and consistency, making it perfect for trainspotters and dancers alike. The tracks change quickly and quietly, but the beat goes on... and on...and on.

“The process of making these mixes has been more like painting with sound rather than performing a traditional dj mix. As you can see I have used a lot of tracks, my intention while working on these mixes however, has not been 'more is more'. Some of the tracks have been reduced to a 2 bar loop, or just the break or the intro. It was inspired and inspiring, and although the mix CD project has finished, it has created many new leads and ideas for future works. I hope that people will enjoy the results, some listeners will be surprised, but I believe I've pushed my own boundaries in a technical, but even more so, in a musical and artistic way”. Joris Voorn.

Performing a yet near impossible task of making 100 tracks mesh and work together in 2 continuous mixes, **Joris** draws on a depth of talent unlikely to be repeated on a mix CD compilation. It takes a visionary DJ to combine tracks from **Radiohead**, through to **Goldie**, **Leftfield**, **Jimpster**, **Aphex Twin**, **Dubfire**, **System 7**, **Minilogue**, **Cobblestone Jazz**, **Emmanuel Top**, **Joakim**, **Âme**, **Mood II Swing**, **Ricardo Villalobos**, **Radio Slave**, **Carl Craig**, **Flying Lotus**, **Marc Romboy**, **Robert Babicz**, **Tiger Stripes** just to name a few.

This isn't a CD you skip through. In some cases one track is infact 6 different tracks from various artists. By allowing the tracks breathe at the right time, **Joris** crafts the mix ever so smoothly; riding along without you even noticing that you are passing from tune to tune. Its all about the subtle transitions, the loops, the multiple layers that make **Balance 014** a musical composition in its own right. So sit back and enjoy as **EQ Recordings** and **Joris Voorn** prepare to take you on a journey that recent mix CD compilations rarely do.

We give you **Balance 014 - Joris Voorn**.

Track 16:

Spinvis - Mare Frigoris

Joris Voorn is a producer and DJ from Rotterdam, Netherlands. Raised in a musical family, music naturally became an intrinsic part of Voorn's life from an early age. Electronic music first caught his attention in the mid-90's, and he started DJ'ing in 1997. After developing a more focused interest in house and techno, Joris invested in the versatile MC-303 Groovebox and began to experiment with synth sounds and drumloops.

In the end of 2000 Joris began building a small studio to produce his own music, which led to his first release called 'muted trax pt.1' on Keynote. His first EP was massive success, filling the record boxes of Carl Craig, Laurent Garnier, DJ Rush and Technasia. In 2003 'Lost memories Pt.1' was released on Technasia's SINO label and was followed by 'Lost memories Pt.2' containing the anthem 'Incident' which was heard on dancefloors around the world.

After the success of 'Incident', Voorn released his debut cd album called 'Future History' on the Sino label. Encompassing 3 years of ideas and inspiration, the cd contains 20 diverse tracks, a seamless soundscape that represents his arrival as one of the most relevant techno producers of this time.

In the summer of 2005 **Joris Voorn's** new personal outlet called 'green' saw the light of day. 'A dedicated mind' was released as the first EP, which garnered success globally. He also completed his debut DJ mix CD for the Fuse club in Belgium. After Dave Clarke, DJ Hell and Technasia, Fuse presented Joris Voorn to mix part 4 of their international residents dj mix albums. The mix contained over 40 tracks of timeless techno music mixed with the help of the Ableton Live for its endless mixing and editing possibilities.

In 2006 the sophomore release under Voorn's Green label, named 'MPX_309', was a crossover techno work that was played out by techno, minimal, house and trance DJs. During the same year Voorn created his second album, released worldwide in June 2007. This new piece of work called 'From a deep place' featured many different styles of electronic music, ranging from atmospheric interludes to broken beats, house and deep soulful techno.

The focus point of the 'From a deep place' CD has been the listener rather than the dancer and was received enthusiastically by the electronic music community. Some of the works were edited to more dj friendly tracks for the vinyl release of the album. During the summer of 2007 Joris has been touring with his new live performance in support of his album release.

2008 will be an exciting year, Joris has been focusing on remixes for the artists Slam, Robert Babicz, Steve Angello, Nic Fanciulli and Jerome Sydenham, which will be released before the summer.

As a DJ and live performer Joris Voorn has joined an elite group of international dj's whose musical talent has acquired global appeal. He has performed across Europe, East-Europe, Japan, Hong Kong, China, Singapore, Malaysia, Australia, Russia, Brazil, Colombia, Israel, Detroit, Chicago and New York.
